

LONE WOLF BLUES COMPANY LLC

Jason Ricci Clean Cat

ABOUT

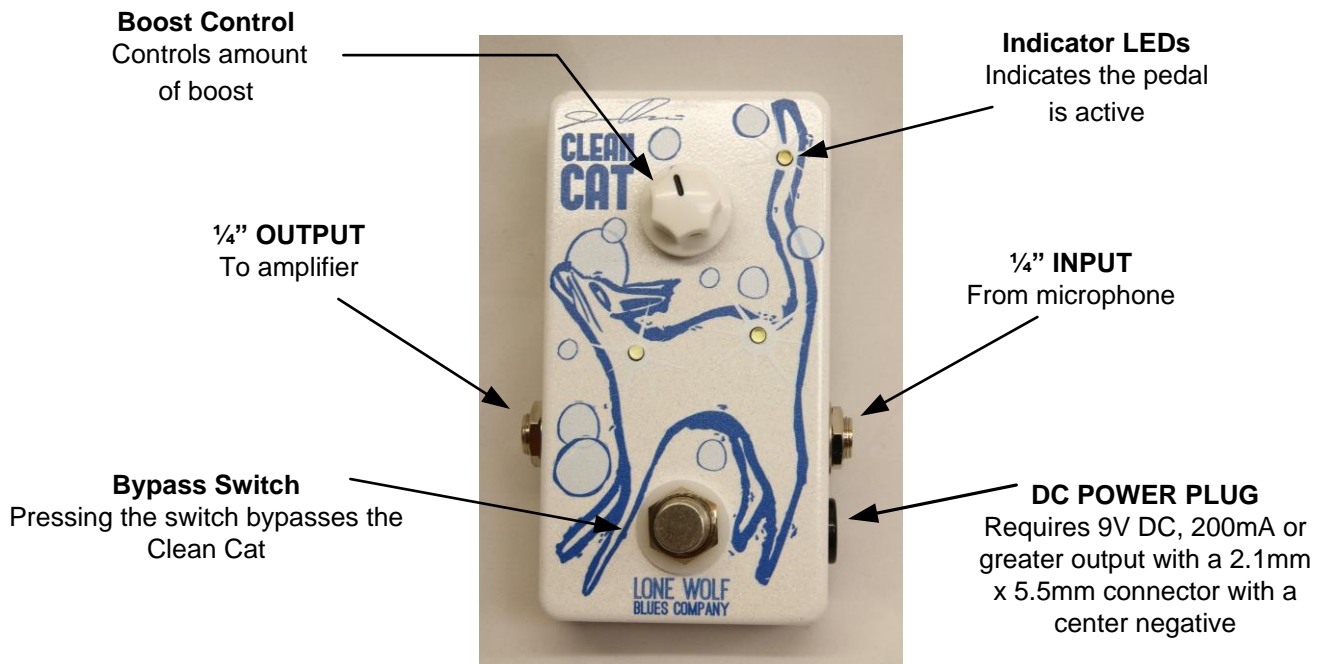

Jason Ricci is a powerhouse in the modern harmonica world, and he worked with Lone Wolf Blues Co. to develop the Jason Ricci signature Clean Cat pedal. The Clean Cat is a clean boost pedal that can be used to give solos a volume boost, hit the preamp of an amplifier harder or push other pedals past their normal limits. The Clean Cat should be used with an amplifier that has plenty of headroom as to avoid increased feedback as a result of boosting the signal before the preamp. The Clean Cat can be installed anywhere in your pedal chain.

SETTINGS

The Clean Cat has only one control, and it determines the amount of boost. With the knob turned all the way counterclockwise, the Clean Cat provides a subtle boost. As the control is turned up, though, the Clean Cat's impressive range of boost is on display.

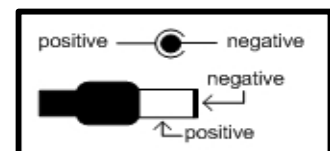

POWER

The Clean Cat operates on 9V DC power. The pedal cannot run on batteries and must be used with an adapter.

FEATURES

1. Boost control
2. Clean, non distorted gain
3. True bypass
4. High impedance buffered input
5. Bypass indicator LEDs
6. Reverse polarity protection
7. 9V DC input (see drawing)
8. 5-year warranty on parts and labor
9. If not satisfied, return within 60 days for a refund of the purchase price minus shipping and 4% credit card transaction fee
